

**Rose Cone Stained Glass  
Lampshade Pattern  
by Carolyn Relei  
Cut 6 for narrower cone  
Cut 8 for wider cone**

## **Rose Cone Shade how to use pattern**

**To use the Pattern:**

**Use heavy stock paper  
and make 6 or 8 copies  
on a copy machine.**

**Then cut carefully  
around the outside outline.**

**Lightly tape the sections  
together to get an idea of  
the size of the finished cone.**

**Choose your colors and proceed  
to make the 6 or 8 flat  
panels. When they are completely  
soldered, join them together to  
form a cone, tack solder, then  
full solder together along the  
seam lines. Solder a copper wire  
along the bottom of the shade  
to give the shade more stability.**
